

## Neptune Surfaces in Mansfield

**Mansfield, Texas:** Neptune Underwater Services (USA), LLC is pleased to announce the completion of its relocation to new, purpose built facilities located within the City of Mansfield's Sentry Industrial Park.

The relocation to Mansfield is the latest stage in the evolution of the company that was formerly known as US Underwater Services, based out of neighboring Burleson.

Neptune Underwater Services' General Manager, Bryan Nicholls, said the move marked the culmination of a dynamic transitional phase for the company that is recognized as a leading provider of inland and offshore commercial diving services, including the patented NEPSYS® dry underwater welding technology.

"Neptune's establishment in Mansfield is the result of the commitment and cooperation of the many contributors to the project including the City of Mansfield, the Mansfield Economic Development Corporation, our numerous contractors and of course our very patient and very dedicated staff," he said.

"This is an exciting phase in the development of the business that will act as a catalyst for future growth and will ultimately benefit our growing client base," he added.

Echoing this sentiment, Neptune's Managing Director and CEO, Christian Lange, said the relocation represented a new and exciting chapter in the evolution of Neptune in the USA.

The new Neptune Underwater Services facilities will be officially opened during a formal ceremony to be held on location on the afternoon of March 16, 2010. Included on the guest list will be Mr Lange and the company's Regional Vice President for the Americas, Ken Nimitz.

Neptune Underwater Services (USA) LLC is a division of Australia's Neptune Marine Services Limited, a leading provider of engineered solutions to the global offshore energy industry. Neptune Marine Services is listed on the Australian Stock Exchange.
